Nutrition Month 2024

March is [Nutrition Month](#)! This annual campaign has been created by the [Dietitians of Canada](#) to highlight the importance of making informed food choices and developing both balanced eating and physical activity habits. Adults have a unique opportunity to help youth learn that healthy eating is more than the foods they eat. Below are some helpful resources to encourage healthy behaviours in children.

- [Building Healthy Eating Habits | Support Your Picky Eater](#)
- Visit unlockfood.ca for recipes, food allergies, [menu planners](#), and to also find a Dietitian
- Check out this [free downloadable e-recipe](#) book from a previous Nutrition Month
- For more support around healthy eating, visit [Healthy eating for parents and children - Canada's Food Guide](#)

World Sleep Day, Sleep is Essential for Health – March 15th

Sleep is very important for physical and mental health, but many children and youth just don't get enough. Lack of sleep may cause a number of health problems and have a big impact on your child's school performance, behaviour and mental health.

How much sleep does my child/youth need?

AGE	RECOMMENDED SLEEP
Ages 3-5 (Preschoolers)	10-13 hours per day
Age 6-12	9-12 hours per day
Ages 13-18	9-10 hours a night

Source: Recommended amount of sleep for pediatric populations, from the American Academy of Sleep Medicine, 2016

Here are a few tips to consider that may help youth sleep better:

- **Limit naps** – some kids are really tired when they get home from school. A short nap can be helpful, but long naps can interfere with nighttime sleep. Consider keeping after school naps short, no more than 30-60 minutes.
- **Spend at least 1.5 hours outside during daylight hours** – natural light from outside helps set the body's internal clock. This is also important for helping a child's eyes develop properly and prevent nearsightedness.
- **Have an electronic curfew** – it can be helpful to have any electronic screens turned off 1-2 hours before bed. Avoiding screens will reduce blue light and help the brain produce melatonin, a hormone that controls the sleep-wake cycles.

- **Have a regular bedtime routine** – typical routines can include brushing teeth, having a bath or shower, putting on pajamas, going to the bedroom and doing relaxing activities such as reading, drawing, writing, or listening to calming music.

Active School Travel

Walking home from school can take less time than driving. This is especially true if you must arrive early for a parking spot. If you live too far away to walk all the way to school, try driving to a location near your school and walk the rest of the way.

Here are benefits and fun facts about Active School Travel:

- It only takes about 12 minutes to walk 1 kilometre. Try walking to school or a destination near your home. You might surprise yourself with how fast you get there.
- More people walking means fewer cars and less congestion. This makes it safer for everyone. Cars actually drive slower when there are large numbers of people walking.
- Kids who walk or bike to school arrive alert and ready to learn. Practice a walking route to your school to help your child get ready for an active return.
